Pivot Arm

# Luxaflex® System 2000 Timeless Collection Awnings

The System 2000 Awning is an award winning system that has been completely designed and manufactured in Australia.

Having won the prestigious Australian Design Award on debut for its superior materials and ergonomic function, the System 2000 range of awnings is designed to be strong, robust and engineered to last in the toughest Australian environments. This awning has been designed specifically to be fitted to windows as a cost effective solution to offer maximum protection from the sun.

System 2000 Awnings come in 2 styles:

## Lock Arm Awnings

Lock Arm Awnings are incredibly simple to operate. Easy-to-use self-locking arms allow a basic adjustment by hand or by a pull stick to bring the awning within reach smoothly and efficiently. System 2000 Lock Arm Awnings are only suitable for ground floor applications.

## Pivot Arm Awnings

The System 2000 Pivot Arm Awning is just as easy to operate with the added feature that it can be operated from inside the house making it the ideal choice for installations higher than ground level.

## Features and Benefits

### Tested for performance

With the ability to be made in a wide variety of fabrics, the System 2000 range has the ability to perform in adverse weather conditions and has been wind load tested by the CSIRO to ensure suitability in most Australian weather conditions.

### Built to last

The headbox is made from steel and Zinalume® which results in a tougher protective coating that's more resistant to scratches and scuffs. In addition, the headbox end caps and the knuckles on the arms are made from UV stabilised polymers which offer unrivalled strength, durability and will not corrode even when exposed to the harsh Australian environment.

### Picture perfect protection

With a wide range of colours to coordinate with your home, the System 2000 range has a timeless design that can complement the look of most abodes. Through clever design, the side arms of the awning are hidden away discreetly allowing for a cleaner visual when in the down position. System 2000 Awnings also allow you to achieve a consistent look between the upper and lower storeys of your home by using a combination of Lock Arm and Pivot Arm Awnings.

### A Host of Options

There are also a wide variety of control options to suit many applications including hardwired and solar power motorisation, tape, rope as well as crank operation. With internal control options available, the System 2000 Pivot Arm Awning is ideal for upper storey buildings where easy access to external controls is not possible.

## Powder coating selection for System 2000 Awnings hardware

# The Luxaflex® Difference

## Industry-Leading Innovations

Since 1954 the Luxaflex brand has been at the forefront of window fashion innovations offering inspirational and durable customised solutions for your home. Many of our products are patented and are exclusive designs engineered and thoroughly tested for the harsh Australian climate.

## Australian Made Quality

Luxaflex Window Fashions support local industry, which is why many of our products are manufactured in Australia to the highest standards. Enjoy peace of mind with our 5 year warranty\*.

## Child Safety

We understand the importance of safety in the home, especially for those with young children and pets. That's why all Luxaflex Window Fashions are designed with safety in mind and are compliant with the latest ACCC Child Safety Regulations to ensure they can be operated in a safe manner.
