

Luxaflex®
Folding Arm
Awnings

The Luxaflex Contemporary Series of Folding Arm Awnings was developed to bring the latest in design, styling and quality to the Australian market.

The awning series was developed to meet the market demand for modern and contemporary hardware systems that suit the newest architectural design trends.

Each model has been intelligently designed to incorporate a variety of options as standard. For example, drainage front rails on every model, adjustable pitch at installation and a self-levelling front rail.

The Luxaflex Folding Arm Awnings range features 7 awning styles that can meet the needs of any application.

NEW! Nordic Series Folding Arm Awnings Collection

The latest addition offering sleek European performance, designed to suit Australian climate conditions.

Nordic Series Design – KD

An open style awning with sleek finishes and functional design, perfect for covering all spaces.

Nordic Series Semi-Cassette – KS2

Features a modern design and deep front bar for a premium appearance. The compact semi cassette enclosure design provides fabric protection when the awning is retracted.

Nordic Series Arafura

A streamline full cassette design, that retracts into a fully enclosed headbox for ultimate protection and is perfect for wide applications.

Ventura

Ventura has a range of accessories that allow you to customise the design of your awnings. This now includes an option which has been intelligently designed to offer an awning with a narrow width and long projection.

Garda

Garda features an oval design semi cassette. The oval shape provides for a softer and lighter look which makes the Garda Awning ideal for homes with curves in its design.

Nisse

The Nisse Folding Arm Awning is a traditional rectangular design that features a compact sized full cassette awning with sleek lines that add a contemporary finish to any home.

Como

Similar to the Nisse Awning, the Como Folding Arm Awning is a traditional rectangular design that features a large full cassette construction. This feature of the Como makes it ideal for applications requiring a large awning with a contemporary design.

Did you know?

Windows are a big source of unwanted heat loss and heat gain in your home. Choosing the right window coverings means you can improve the comfort of your home all-year-round, reduce your power bills and cut carbon pollution.

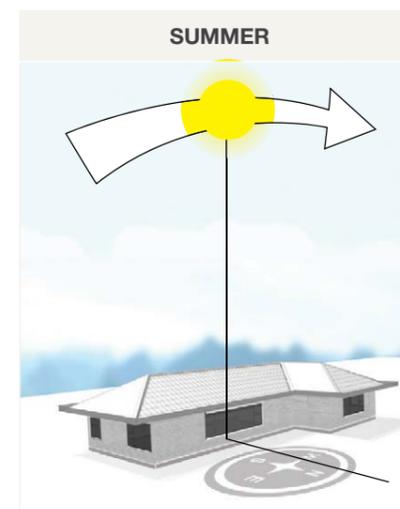

Impact of the sun on your home

Throughout the day, the sun moves from sunrise in the East through the North sky and sets in the West. This means the amount of heat from the sun received by a window varies according to the orientation and time of year.

In summer, the sun travels higher through the sky with direct exposure to the East and West windows. Whereas in winter other factors that can impact the energy efficiency and comfort of your home include window size, orientation, glazing treatments, shading and internal window coverings.

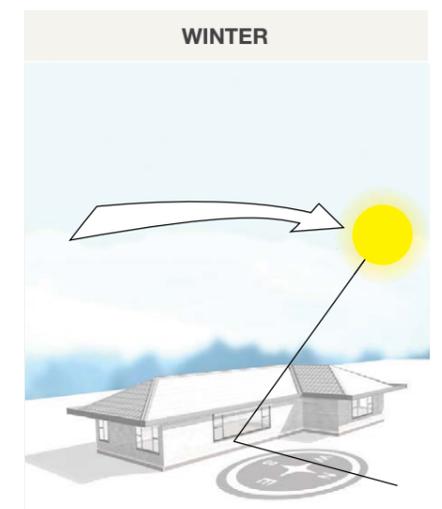

Each home is different. Window size, orientation, glazing treatment, shading and internal coverings can have a significant impact on energy efficiency and conform.

Luxaflex Folding Arm Awnings easily retract and extend providing the perfect solution for your home, year round.

Keep your home cool in summer

During summer, up to 30%* of total heat loss from a home occurs through uncovered windows, especially those facing east and west. Shading your windows with Luxaflex Awnings can minimise heat in your home which will create a comfortable, cooler environment and save you hundreds of dollars on energy bills.

Keep your home warm in winter

You can control the temperature of your home in winter without relying on power-hungry heating appliances. To make the most of sunny days, open your awnings on windows facing the sun – this will let in sunlight and warmth, and will help to minimise the need to use your heating system. Keep the warmth inside during winter using well-fitted insulating window coverings such as Luxaflex® Duette® Architella® Shades.

Luxaflex® Nordic Series Design KD Folding Arm Awnings

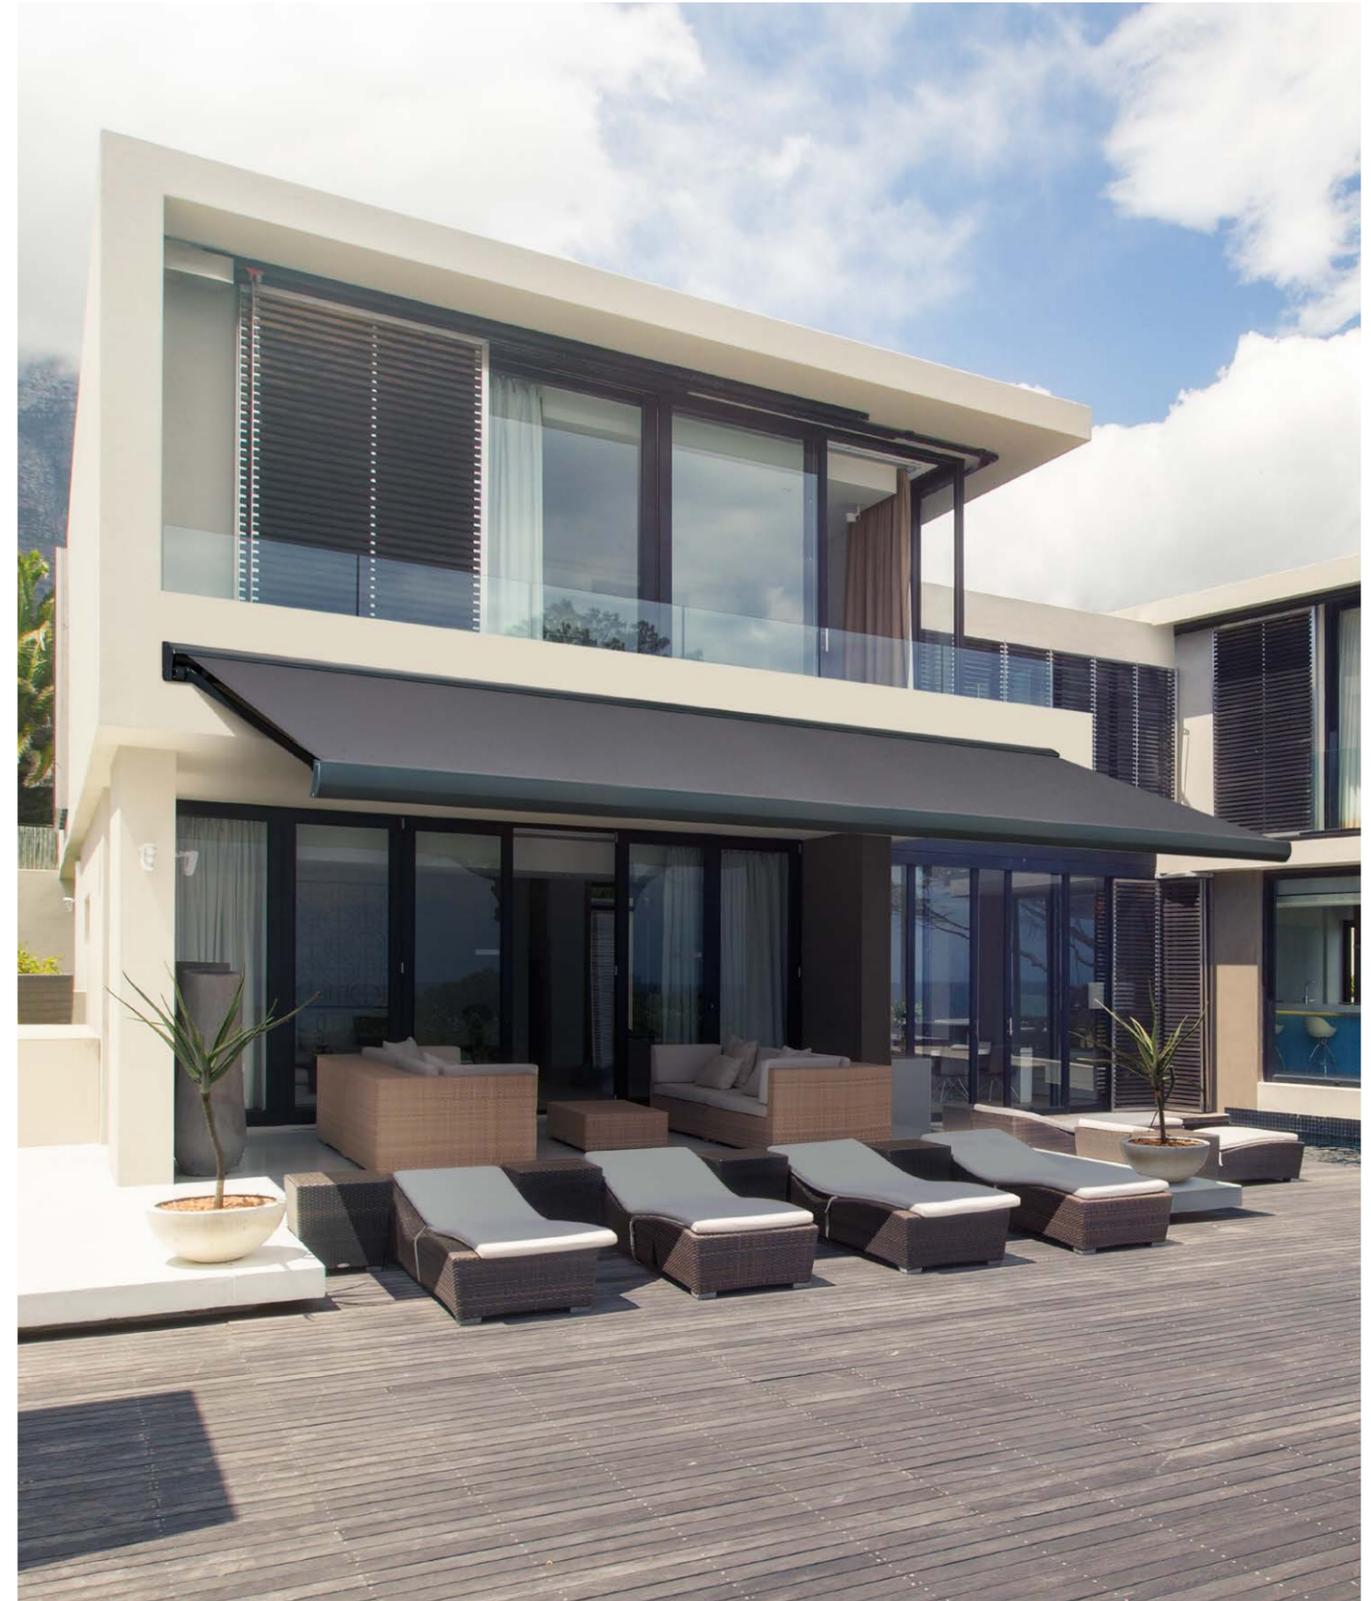

Nordic Series Design – KD Folding Arm Awning

A quality European style awning with sleek finishes such as wall and end brackets. Its versatile and functional design covers all spaces from tiny terraces to wide expanses, with capabilities of covering an area up to 7 metres wide with a projection up to 4.0 metres.

Nordic Series Design- KD is available with a variety of optional accessories, including a rain hood for additional fabric and hardware protection, a sunscreen roller valance for enhanced shade protection as well as an optional Variable Pitch Control. Variable Pitch Control is a unique and easy-tilt feature which allows you to adjust the pitch of the awning when it is projected, providing ultimate shading throughout the day as the awning projection can be angled throughout the day. Available with crank control and motorised operating options.

Luxaflex® Nordic Series Semi-Cassette – KS2

Nordic Series Semi-Cassette – KS2 Folding Arm Awning

Features a modern design with a near full-cassette look. Its slimline hood and deep front bar adds a premium appearance, whilst its compact semi-cassette enclosure design provides fabric protection to keep moisture, debris and dirt away when the awning is retracted. The KS2 awning pitch is customisable at time of installation allowing the awning to be set at the optimum angle for maximum sun protection.

Luxaflex® Nordic Series Arafura Folding Arm Awnings

Nordic Series Arafura Folding Arm Awnings

A streamline full-cassette design that retracts into a fully enclosed headbox for ultimate hardware and fabric protection from moisture, debris and dirt. The modular European design is built for performance with heavy duty componentry making it perfect for residential or commercial applications up to 7 metres wide. The Arafura pitch is customisable at time of installation allowing the awning to be set at the optimum angle for maximum sun protection.

Luxaflex® Ventura Folding Arm Awnings

Ventura Awning

The Ventura Folding Arm Awning offers some of the best features in the Open Style awning class and has been designed and engineered in Europe. With its timeless design, the Ventura Folding Arm Awning is simple and quick to install and can be equipped with a wide range of accessories such as a wind protection system, variable valance and the choice of two rain hoods.

Luxaflex® Ventura Terrace Folding Arm Awnings

Ideal for applications with narrow width and long projection

Ventura Terrace Awning

An ideal solution for apartments, patios and terraces that require a narrow awning with a long projection. The clever design of the Ventura Terrace Awning allows for the arms to be offset one above the other. The functionality of the Ventura Terrace Awning allows it to span widths from 1.5 - 4 metres with a projection of 4 metres and provides maximum flexibility for all types of applications.

Luxaflex® Ventura Folding Arm Awning Options

Trend Hood

The Trend Hood is fully integrated into the construction of the Ventura Folding Arm Awning and provides fabric protection when the awning is retracted. The hood angle is fully adjustable to suit users' preference at the time of installation.

Available with Ventura FAA.

Standard Rain Hood

This sleek and modern solid aluminium rain hood provides excellent protection for fabric when the awning is retracted. Additionally, it mounts flush against a flat wall surface ensuring no water run off behind the awning's mounting point. Available in standard and powder coat colour finishes.

Available with Ventura FAA, Ventura Terrace FAA and Sunrain Awnings.

(Only available on Face Fit installations)

Variable Valance

The Variable Valance option allows the user to control the height for the retractable valance for additional privacy and shade.

Available with Ventura models only.

Wind Protect System (WPS)

With the custom Wind Protect System, the Ventura Folding Arm Awning can withstand higher wind forces. By stabilising the front bar, less strain is put on the hardware therefore extending the awning's life. With removable feet and front rail clip, the telescopic wind protect poles collapse for easy storage when not in use. Available for heights between 2 - 2.5 metres from ground to front rail.

Available with Ventura FAA and Ventura Terrace FAA.

Luxaflex® Garda Folding Arm Awnings Semi Cassette

Garda Folding Arm Awning

Designed in a beautiful and distinctive oval shape, the Garda Folding Arm Awning is made from special hardened aluminium making this a strong, sturdy and sleek design perfectly suited to modern architectural design curves.

Bottom Profile

The bottom profile can be installed under the fabric roller to ensure complete fabric encasement. This provides the ultimate in Semi-Cassette fabric protection.

Small Rain Hood

This sleek and modern solid aluminium rain hood mounts flush against a flat wall surface ensuring no water run off behind the awning's mounting point.

Available in standard and powder coat colour finishes.
(Only available on Face Fit installations).

Semi Cassette Head Box

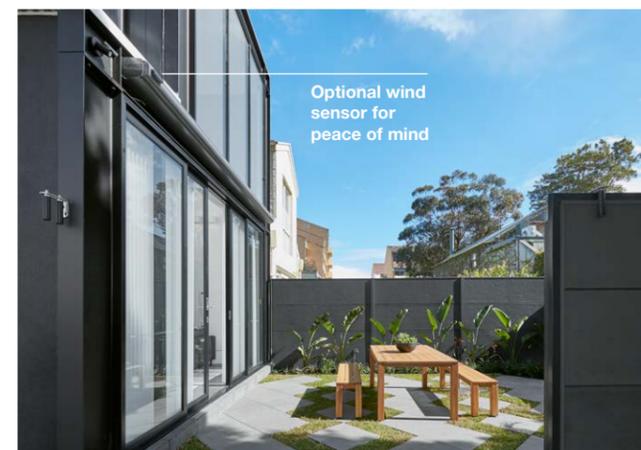

This offers increased protection for awnings mechanism and fabric compared to an open style awning.

Luxaflex® Nisse Folding Arm Awnings Full Cassette

Nisse Folding Arm Awning

The Nisse is a compact sized full cassette awning designed to be unobtrusive. The Nisse Awning is capable of covering an area of 5 metres wide and 3.5 metres projection, making the Nisse Awning a versatile and modern addition to any home. This popular small sized compact full cassette awning offers strength and durability against the harsh Australian environment while keeping your home cool and protecting against harsh UV radiation.

Como Folding Arm Awning

The Como is a full sized cassette awning capable of covering an area of 6.5 metres wide and 4 metres projection. The Como also features the option of coupling two awnings to cover an area up to 13 metres wide and 4 metres projection, making the Como a fully featured awning that can cover vast expanses.

Unique to these models; the awnings' mechanisms, arms and fabric become fully concealed when retracted offering both superior protection for years of trouble free operation as well as the elegance of an uncluttered, smooth finish.

Motor Control to flexibility and ease of use.

Home Automation

The Luxaflex range of awnings offer a range of control options aimed at maximising flexibility and ease of use for consumers.

A range of external motor solutions allows Luxaflex Folding Arm Awnings to be operated at the touch of a button or via a wall switch.

These motor controls feature a range of options including a sun sensor that is designed to extend your awning and provide shade to your home, as well as wind sensors designed to retract your awning during windy conditions and prevent damage to your awning.

Heating option

Heating and Lighting

All models in the range allow for the option of adding our heating and lighting to create the perfect atmosphere for year-round entertaining, day or night. This slimline unit has been engineered for outdoor use and eliminates the need for cumbersome gas patio heaters.

Note: Independently installed for Nordic Series.

Eolis 3D sensor

Anemometer sensor

Wind Sensor Options

Eolis 3D sensor is mounted on the front rail of the folding arm awning and uses a motion detector to sense the effects of the wind on the awning. As the wind speed picks up, the sensor signals the awning motor to retract the awning.

Anemometer sensor is externally wall mounted facing the same aspect of the awning, as the wind speed picks up, the sensor signals the awning motor to retract the awning.

Powder Coating

Luxaflex Folding Arm Awnings feature hardware powder coated in colour Silver as standard. In order to maximise flexibility, you also have the choice of any of the Dulux® powder coat colours to choose from allowing you to truly customise the awning to match your home's exterior.

Note: Not available with Nordic Series KD, KS2, Arafura.

Customise the awning to match your home's exterior.

The Luxaflex® Difference

Innovation is our Heritage

Luxaflex Window Fashions has been a leading brand in Australian homes since 1954. With a Dutch heritage, design and innovation are at the core of the brand. Since the invention of the Aluminium Venetian Blind, the company behind the Luxaflex brand has continued to expand the Australian product range, combining the best of international and local innovations.

Australian Made Quality

Most of our product range is made to measure in Australia from components and materials made in our Australian factories or sourced from around the world. Our commitment to supporting Australian manufacturing provides local jobs to Australians and ensures we maintain strict control of our quality standards and faster lead times for our customers.

Industry Leading Designs

Many of our products are patented and exclusive to Luxaflex Window Fashions. Our entire range is engineered and thoroughly tested to meet the high quality standards of the brand, but also to deliver high performance in our harsh Australian environment, and to maintain the quality appearance for the life of the product.

Peace of Mind

You have complete peace of mind when investing in quality Luxaflex Window Fashions. We stand behind our products by offering a 5 Year Manufacturer's Warranty* supported by the world-wide market leading company.

Child Safety

We understand the importance of safety in the home, especially for those with young children and pets. That's why all Luxaflex Window Fashions are designed with safety in mind and are compliant with the latest ACCC Child Safety Regulations to ensure they can be operated in a safe manner.

Personalised Service

All Luxaflex Window Fashions are custom made to your exact window requirements so they fit perfectly. Our Luxaflex Window Fashions showrooms provide the ultimate experience to make it simple and easy - from your initial enquiry and showroom visit through to the after-sales service.
